Update on Visitation Restrictions for Units 3A and 3B at Central Newfoundland Regional Health Centre

Due to ongoing cases of Norwalk-like illness, the current visitation restrictions on Unit 3B at the Central Newfoundland Regional Health Centre will continue until further notice.

Full visitation has been reinstated for Unit 3A at the Central Newfoundland Regional Health Centre effective immediately.

The needs of patients and residents are being met through ongoing care from staff. Family members can check on their loved ones by telephoning the 3B nursing unit or by calling the switchboard at 292-2500.

Family members who have any questions should contact Central Newfoundland Regional Health Centre and ask to talk with the nurse in charge of Unit 3B.

The public's cooperation is requested as we put these precautions in place to prevent the further spread of this virus.
