- Learn how to perform the Audio Settings that launches upon log-in to Fusion Expert
- Learn how to Dictate a report (New Job)
- Learn how to Electronically Sign a report (iDocview)
- Learn how to Pause a dictation (Paused Jobs)

Double click on the Fusion Expert icon on your "Desktop"

Enter your "USER NAME" provided Enter your "PASSWORD" Provided

STEP 1 – Audio Settings

Audio Settings	x
Your audio settings are in need of updating. Please press OK t Audio Settings Wizard.	o step through the
	OK

- The Audio Settings will launch upon log-in. This setting is only required "once" per work station. The audio setting measures the background noise and adjusts the dictation accordingly.
- Hit "OK". The steps proceeding will step you through the Audio Settings.

Audio Wizard			
	Welcome to the Audio Wizard		
	The Audio Wizard will help you set up your audio system. This is important so that your system is able to recognize you when you speak. Make sure the microphone and the speakers are connected. Input channel: N/A Recording device: Microphone Array (Realtek High To continue, click Next.		
	< Back Next > Cancel Help		

• Hit next to step through the process.

Audio Wizard	Devices The devices that you select here overrule the Microsoft Windows default devices.
	Preferred recording device: Microphone Array (Realtek High Preferred playback device: Headphone (Realtek High Definit
	< Back Next > Cancel Help

- The work station should have the appropriate recording device assigned.
- Hit next to step through the process.

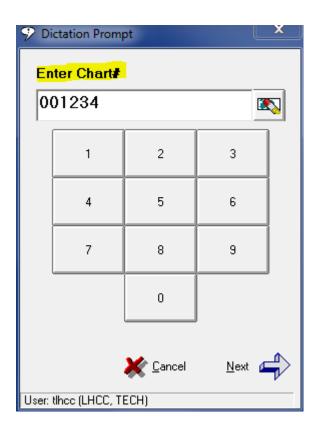

Audio Wizard			
	To begin, click Start Test. Use the slider to adjust the playback volume.		
	To end the test, click Stop Test. Continue on the next page.		
	Low J		
	Start Test		
	< Back Next > Cancel Help		

- Hit "Start Test". This step gives you the playback volume. To adjust the playback volume, you can move the "low – high" parameter back and forth to set volume.
- Hit next to step through the process.

Audio Wizard		
	To set your recording volume and silence detection level, click Start Recording and read the text. Speak until you hear a beep.	
	The Audio Wizard is for adjusting the recording volume, playback volume and silence detection level. Background noise will not be recorded.	
	You may have to read this text twice. Start Recording	
	< Back Next > Cancel Help	

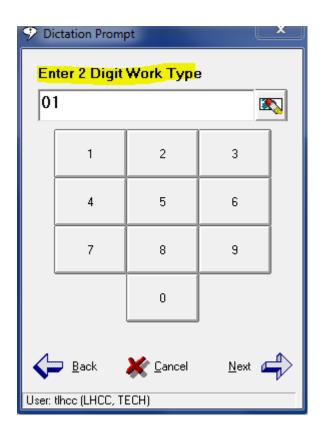

- Using your "Speech Microphone", you will need to read the paragraph provided holding the microphone approximately 6 inches beneath your chin. Once you hear a "bing", you settings are complete. Note: You may need to read the paragraph more than once.
- Hit finished once complete. Your audio settings should be completed.

STEP 2 – Dictation

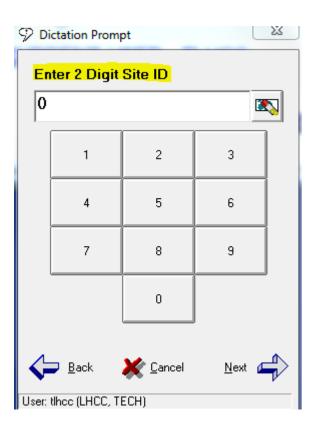

- To start a new dictation, hit New Job
- Enter a "6" digit chart number (this would be the "W" number for Central Health)
- NOTE: Once you hit the last digit of the 6 digit chart number, the dictation prompt automatically prompts you for the work type.

Dictation continued

- A 2 digit Work Type is required for dictation. This step attachs a work type to a report type for transcription.
- A Dictation Card will be provided to you with a list of work types.
- NOTE: Once you hit the last digit of the 2 digit Work Type, the dictation prompt automatically prompts you for the Site ID.

Dictation continued

- A 2 digit Site ID is required for dictation. This step places the dictation to the appropriate work pool in the Dictation Console for transcription.
- A Dictation Card will be provided to you with a list of Site IDs.
- NOTE: Once you hit the last digit of the 2 digit Site ID, the Dictation Window launches.
