

At Central Health we strive to constantly improve the care our patients receive. Our priority is Person- and Family-Centered Care (PFCC) consisting of healthcare that is respectful, compassionate and focuses on the patient and family needs, values, and beliefs.

We are currently recruiting **Patient Experience Advisors** for **Central Health's Regional Acute Stroke Care Working Group**.

Approximately 1400 Newfoundland and Labradorians are newly affected by stroke or Transient Ischemic Attack (TIA) each year.

Central Health is seeking volunteers as Patient Experience Advisors to partner with us as we work together to improve care for persons experiencing a stroke or TIA. The purpose of the Regional Acute Stroke Care Working Group is to spelling implement Canadian Stroke Best Practice Recommendations for Acute Stroke Management within Central Health, and to contribute toward achieving formal stroke unit designation as outlined in Central Health's Strategic and Patient Safety Plan.

We know from experience that delivering the best service starts with listening directly to the voices of patients and families. Central Health seeks to engage with, listen to and learn from our patient and families' experiences. The Regional Acute Stroke Care Working Group is seeking 2 Patient Experience Advisors to bring the patient perspective as members of that team.

Are you,

- Interesting in partnering with Central Health to improve healthcare in our region?
- Have experience with stroke care with Central Health as a patient or family member in the last 3 years?
- Compassionate and a good listener?
- Interested in learning more about this new and exciting volunteer opportunity?
